

Perfecting your Password Policies

KEEP YOUR ORGANISATION SECURE WITH THESE PASSWORD STRATEGIES

Detect, Alert and Monitor

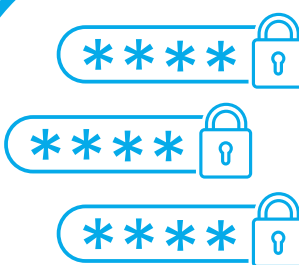

Identify compromised passwords and force users to change them when breached. Monitor password activity across all accounts.

01

Prevent Password Re-Use

Stop password sharing between multiple accounts and disallow number cycling when changing.

02

Protect Every Account

Ensure all accounts have compliant passwords including expired and dormant accounts.

03

Minimize Password Reliance

Implement Multi-Factor Authentication (MFA), where possible, and offer passwordless alternatives like Single-Sign-On (SSO) and biometrics.

04

Achieve User Confidence

Eliminate password complexity requirements and eradicate regular password expiry.
